PROJECTS

E-Commerce Store – Jewelry Business (Client Project) Tech Stack: Shopify, Liquid, HTML, CSS, JavaScript

madihajewels.store

- Developed and managed a Shopify jewelry store, customizing design and functionality with Liquid, HTML, CSS, and JavaScript.
- Implemented product listings, optimized navigation, and configured payments and shipping for a seamless shopping experience.
- Ensured mobile responsiveness, performance optimization, and provided ongoing maintenance.

BinGenie – AI-Powered Recycling Assistant (Collaborative Project) Tech Stack: Django, Deep Learning, JavaScript, HTML/CSS

GitHub: <https://github.com/dua-saif/BinGenie>, Live: <https://bingenie.live/>

- Developed a responsive web app using image recognition to classify waste as recyclable or non-recyclable.
- Trained a deep learning model on 25,000+ images, achieving ~92% accuracy.
- Implemented real-time image capture with dynamic previews and an interactive frontend featuring notifications and animations.
- Collaborated via GitHub and integrated educational components to promote recycling awareness.

Wikipedia Clone – Django Encyclopedia Web App (Individual Project) Tech Stack: Django, Python, HTML/CSS, Markdown

GitHub: <https://github.com/dua-saif/Wiki>, Live Link: <https://wiki-wctn.onrender.com>

- Developed a web app allowing users to create, edit, and view encyclopedia entries with Markdown support.
- Implemented case-insensitive search, random page access, and file-based storage for dynamic content.
- Leveraged Django MVC, template inheritance, and clean routing to build a scalable, user-friendly interface.

DuaSaif – Personal Portfolio Website (Individual Project) Tech Stack: Django, HTML/CSS, JavaScript

duasaif.com

- Built a responsive portfolio site to showcase projects and skills, with customized templates and user-friendly navigation.
- Managed content and site functionality using Django, emphasizing clean design, visual appeal, and cross-device performance.
